ARI SETIAWAN

Developer and Digital Marketer

Kendari, Indonesia | mohino.web.id | arimohino@gmail.com | linkedin.com/in/ari-setiawan-5b39b7254 | github.com/arisetiawan0

Developer and digital marketer at ABS Group, a 26-branch retailer in Southeast Sulawesi. I build internal systems for the business end to end, from requirements and database design to deployment: a promotion management dashboard with 334 promotions on record, an AI beauty consultation chatbot, a void and refund reporting PWA, and an HR system now in development.

Bachelor of Informatics (GPA 3.54), Bangkit Academy Mobile Development graduate, and MySkill Digital Marketing Fullstack Bootcamp alumnus. Alongside development I run paid campaigns, social media content, and SEO for Beauty Kendari, so the systems I build are shaped by what customers and the marketing team actually need.

WORK EXPERIENCE

Digital Marketing Staff · CV Anugrah Bhakti Sentosa (ABS Group), Kendari — Nov 2025 – Present

Holding company of the Beauty, Bexmart, and Ceria outlets: cosmetics, FMCG, and accessories retail with 26 branches across Southeast Sulawesi.

- Built and deployed **Promo Portal** (Next.js, TiDB), an internal dashboard to manage promotions across brands and outlets, with layered filters, an approval workflow, Excel export, and webhooks; 334 promotions on record.
- Built the **Beauty Kendari AI chatbot** (Next.js, Supabase, Cloudflare Workers, LLM API): stock and price answers per outlet, beauty consultation including personal color analysis, and skin analysis from a face photo, with photos deleted automatically after 24 hours.
- Building the **ABS Group HRIS** solo to replace Talenta: Laravel API, PostgreSQL, TanStack Start web admin, React Native (Expo) mobile app, and server-side face recognition attendance (InsightFace via FastAPI).
- Built a **void and refund reporting PWA** for cashiers, with per-outlet sign-in, automatically timestamped photo evidence, and periodic exports for supervisors.
- Automated data work: a sales and stock archiver for 30 outlets into BigQuery (n8n, Cloudflare Tunnel), a Pareto analysis tool covering about 17,000 SKUs, and an Instagram and TikTok sentiment pipeline (Apify, GitHub Actions, Supabase).
- Ran paid campaigns for Beauty Kendari on Meta Ads (optimized for traffic and WhatsApp chats), Google Ads, and Shopee Ads, and managed Instagram and TikTok content and posting schedules.
- Optimized SEO on the website and marketplace listings, and prepared regular campaign reports as the basis for marketing decisions.

PIC Vendor · PT Finfleet Teknologi Indonesia, Yogyakarta — Jan 2025 – Mar 2025

- Managed outsourced manpower and day-to-day courier operations.

Processing · PT Amartha Manunggal Prima, Yogyakarta — Dec 2022 – Sep 2024
